**DETAILED ACTION**

***Election/Restrictions***

1. Claims 18-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected subcombinations, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/7/06.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP403021593A (hereinafter called 593).

- a. Re claim 1, 593 discloses a helicopter as seen in figure 12 with a power unit (7 and 9) with a rotor 9 and engine 7 coupled to drive the rotor. Also 593 discloses an airframe 23 suspended from the power unit and pivotally coupled to the power unit for pivoting about the pitch and roll axes. 593 also discloses a plurality of control actuators coupled between the airframe and power unit as seen in that the stick 16 controls the levers (actuators) that move the frame with respect to the rotor and engine. The rotor and engine then tilt with respect to the frame about pitch and roll axes.

Art Unit: 3643

- b. Re claim 2, 593 discloses inherently that the pitch and roll axes intersect at about the center of the box 3 in the figure 12.

***Allowable Subject Matter***

4. Claims 3-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following disclose control systems for helicopters.
